DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 5, filed 8/1/2007, with respect to the 35 USC §101 rejection have been fully considered and are persuasive. The rejections of claims 9-16 have been withdrawn.

Allowable Subject Matter

1. Claims 1-8 and 17-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention describes the method and apparatus for filtering common mode interference. The closest prior art, Johnson (US 5,920,223) discloses a method and apparatus to improve immunity to common-mode noise. However, Johnson fails to disclose summing the levels of a subset of data channels to get a summed level and compare the summed level to the highest level present in the plurality of data channels and rejecting a common mode interference in each of the plurality of channels if the summed level exceeds the highest level. The distinct features have been added to the independent claims 1 and 17, therefore, rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
